Complete set:
Electronic TSE profile cylinder,
keypad PINCODE, batteries,
operating and assembly instructions

Simple DIY installation – in a few steps to get electronic security:

1 Remove the existing profile cylinder and replace it by the electronic TSE profile cylinder.

2 Screw the electronic TSE profile cylinder on the door as usual.

3 Adjust to the door thickness by integrated detent system.

4 Affix the exterior knob by using the allen key provided.

5 Install the TSE Keypad PINCODE or FINGERSCAN in an appropriate position. The distance between TSE Keypad PINCODE/FINGERSCAN and your door can be up to 10 m.

Open or close the door simply and safely by pushing the button of your TSE E-KEY or by entering a 6-digit user code into the keypad of the TSE Keypad PINCODE or FINGERSCAN which are available as options.

The Wireless technology allows an **easy assembly** without drilling, cable, etc.

TSE | HOME & BUSINESS

Electronic door lock

Trendsetting comfort. Superior security technology.

BURG-WÄCHTER is one of the leading manufacturers of padlocks and locking systems and is also a pioneer for the development of electronic door locking systems.

TSE HOME and **TSE BUSINESS** brings state-of-art security technology into everyday use – from the entry door up to the garage. As a user you will get a complete new and superior feeling about security due to not having the need for mechanical keys. The radio

key with the **TSE E-KEY** or the operation of the **FINGERSCAN** module or the **PINCODE** keypad make the everyday opening of doors not only more comfortable but they also elevate it to a lasting positive experience.

Mistakes, changes and further technical developments reserved.

Test the comfortable TSE security technology by your TSE-System partner or your security speciality retailer:
